

GET READY FOR THE 2010 DIABETES & KIDNEY DAY

ADVOCACY 101 WEBINAR

Diabetes caused 48,871 cases of kidney failure in the United States and 1,629 cases in Michigan in 2007. Many of these cases could have been prevented. Diabetes and high blood pressure are the leading causes of kidney failure, but when properly managed, kidney failure can often be prevented ...

BUT state funding cuts are threatening diabetes and kidney programs that help prevent and manage diabetes, high blood pressure and kidney disease.

Volunteers who attend the 2010 Diabetes & Kidney Day on Wednesday, April 28, 2010, 9:00 am-3:30 pm will be advocating for these programs.

Prior to the 2010 Diabetes & Kidney Day, you are invited to participate in an ...

ADVOCACY 101 WEBINAR

Thursday, March 25, 2010

1:00-2:00 pm

Please register for the webinar to learn about the advocacy process and how to support issues related to diabetes, chronic kidney disease, and state-funded prevention and management programs.
