

# Strategic Planning Process

## Diabetes Improvement Plan 2020-2025

### Strategic Process Components

Developed in collaboration with statewide partners through Key Informant Interviews, Partner Feedback Sessions and Advisory Group

### Diabetes Improvement Plan Foundation – Health Equity

The creation of an equity-focused approach to diabetes prevention and management is a foundational value of the MDHHS Diabetes Prevention and Control Program. We are actively working to increase access to resources and services within communities experiencing the greatest health disparities.

### Diabetes Plan Priority Areas

- State Leadership
- Diabetes Prevention
- Diabetes Management

## State Leadership

- Enhance network partnerships.
- Engage leaders.
- Drive innovation and expand cross-program collaboration.
- Provide support and educational opportunities for diabetes professionals.

## Diabetes Prevention

- Reduce barriers to DPP participant engagement and success.
- Enhance policy and coverage for prediabetes and the Diabetes Prevention Program (DPP).
- Build systems to support 'Screen, Test, Refer' for prediabetes.

## Diabetes Management

- Enhance medical coverage of Diabetes Self-Management Education and Support (DSMES).
- Increase utilization of technology.
- Increase incentives for health care providers.
- Advance care for people living with diabetes.

# Call to Action

- Diabetes Improvement Plan will be **released** in early 2021
- DPAC Partners are asked to **share the plan** and **implement strategies** that fit within their organization and communities they serve
- **Share your ideas and innovative work** with us, we can showcase our partner activities and create opportunities for statewide collaboration
